GENERAL

uPVC profiles are made as per the Indian market needs with the world renowned brand machines. uPVC profiles manufacturing unit is fully equipped from R&D and working with a strategy of continual improvement.

TYPES OF WINDOWS

uPVC Profiles is having the product range for sliding windows, Casement Windows & Doors. Partitions & the related accessories.

WHY uPVC PROFILES?

- Updated technology on product design.
- Fully automated process.
- Closed loop process system - from Raw material to finished product
- Excellent weather and impact resistance Anti-Impact & Anti-UV Performance
- Excellent insulation property on thermal and sound
- Specially designed friction hinges for Casement Windows.
- New technology accommodates more to learners on glass cutting sizes in casement window.
- Elegant Designed Profiles will attract everyone for its curves and finish on the fabricated window.
- Specially designed door sash will accommodate the general door lock available in the Indian Market, hence cost reduction is assured in fabricating the door with Astrix uPVC Profiles.
- This feature allows the end user to have a selection of lock designs according to their requirement.

SLIDING WINDOWS

Features & Benefits

- ❖ The horizontal sash movement ensures better ventilation
- ❖ Availability of multi-track and sash options to cover larger areas
- ❖ Easy locking system
- ❖ Come in a variety of designs, colors and hardware options. Best utilization of space since the sashes open left to right or vice versa
- ❖ Air-tight, helps to keep- noise, dust, heat and pollution outside
- ❖ Monsoon track for heavy rains, and hurricane bars for high wind loads

SLIDING DOORS

Features & Benefits

- ❖ In Sliding doors two or more frames slide horizontally on tracks to the left or the right.
- ❖ The doors are slightly raised above the track for smooth slide and also preventing dust from settling down in the track. Sliding doors are ideal for homes that require space-economy.
- ❖ Sliding doors are affordable option to bring more light into your home, as these cost effective doors can support large spans of glass and have a relatively slim vertical profile.
- ❖ This allows you to maximize the amount of light that can enter your home, showcasing the space to best effect.

CASEMENT WINDOWS

Features & Benefits

- ❖ Practical and Simple, designed to suit your home whatever is its style, casement windows are among the most popular window designs.
- ❖ Hard-wearing material used in casement windows is virtually maintenance-free.
- ❖ Upvc casement window are tailor-made to virtually any height and width, you can have this classic window made to your exact requirement. Plus, your casement windows will be fitted to the highest standards and also provides easy cleaning of the outer glass panes.

TOP HUNG WINDOWS

Features & Benefits

Top Hung windows are like traditional casement windows, with one major difference. Casement windows pivot on hinges mounted on the side, while awning windows pivot on hinges mounted at the top. It can be used independently or in combination with other windows. They are particularly useful for ventilation. They are placed higher in walls which provide natural light and ventilation, without compromising privacy. Highplacement also allows for maximum wall space for design aspects such as art and furniture placement. They allow nearly 100 percent viable ventilation, without the threat of water seeping into the home.

TILT & TURN WINDOWS

Features & Benefits

- ❖ Tilt and turn windows combine versatility with a smart, simple style ideally suited to modern homes.
- ❖ Just by turning the handle of tilt and turn windows once it opens the top slightly for secure ventilation. Twist the handle again and the window will swing inward on its side hinges for easy cleaning.

uPVC

PRODUCT FEATURES

- There are many reasons as to why you should install uPVC windows.
- They offer excellent energy saving - uPVC is an excellent insulator saving money on electricity bills. uPVC windows are also very durable, ensuring that very little maintenance is required during its lifetime.
- Due to their robustness, uPVC windows offer excellent security.
- Their frames are constructed to the utmost hardness making it very difficult to break.
- Above all, these windows are incredibly low cost in comparison to timber windows.
- uPVC windows are an affordable solution to your window needs.

WIND LOAD

There is close connection between wind load and safety because most of the claims and defect root is breakage of window by using of low quality window. Therefore while choosing window manufacturer.

It is strongly recommended to verify the supplier technical capability, history and reputation to secure the safety.

Economical & maintenance Free

Economical when compared to the other alternative like wood. Smooth makes it extremely easy to clean, using any household detergent in water. Virtually dirt resistant because there are no pores, which can be filled with dirt. Do not require regular repainting or expensive maintenance and also Termite Resistant.
